MANAGEMENT DISCUSSION AND ANALYSIS

The following discussion and analysis should be read alongside the unaudited consolidated financial results of the Group for the six months ended 30 June 2022 (the “Interim Period”).

FINANCIAL REVIEW

Revenue

Revenue increased by 25%, from HK\$36.3 million for the corresponding period in 2021 to HK\$45.3 million for the Interim Period, fuelled by the increase of products sales. The increase was mainly due to the improvement in global supply of integrated circuit chips, and the relieve of overseas control measures for novel coronavirus disease (“COVID-19”) so more national-based government projects resume normal operation.

Gross Profit Margin

Gross profit margin was 52% for the Interim Period (2021: 56%), the decrease was mainly due to the increase of material cost and lower gross profit margin for some old customers in order to maintain the relationship with them during this economic downturn period.

Operating Expenses

Total operating expenses decreased by 20%, from HK\$30.6 million for the corresponding period in 2021, to HK\$24.4 million for the Interim Period. The depreciation of Renminbi against Hong Kong dollar during the Interim Period resulted in a decrease of Renminbi denominated payable balances, whereas appreciation of Renminbi against Hong Kong dollar was noted during the corresponding period in 2021. This lead to a decrease in exchange difference of HK\$3.1 million included in operating expenses. Furthermore, depreciation of property, plant and equipment and amortisation of intangible assets decreased by HK\$2.4 million due to the fact that there were less depreciable property, plant and equipment and intangible assets during the Interim Period. Certain effectively cost control measures carried out during the Interim Period also successfully reduced the operating expenses.

Profit for the period

A profit of HK\$0.1 million was recorded for the Interim Period, a turnaround from the loss of HK\$10.9 million for the corresponding period in 2021. The significant improvement in interim results was mainly attributable to the improvement in revenue and gross profit due to increase of products sales, as well as reduction of operating expenses during the Interim Period.

Statement of Financial Position

As at 30 June 2022, the Group's net assets amounted to HK\$80.0 million (31 December 2021: HK\$81.4 million). The decrease of HK\$1.4 million was due to the net profit of HK\$0.1 million offsetted with movement in exchange reserve of HK\$1.5 million for the Interim Period.

DIVIDEND

The Board does not recommend the payment of an interim dividend for the Interim Period.

BUSINESS REVIEW

The Group had a steadily growth in the first half of 2022, despite a turbulent macro backdrop and the ongoing pandemic. During the Interim Period, the Group continued to focus on products development and keep looking for opportunities in developing countries by expanding our market shares. We received positive customer response with the newly launch of ACR350 Payment Terminal for transportation during the Interim Period.

Notwithstanding the above, our business was affected by the geopolitical tensions. Our European customers have tendency putting their purchase plan on-hold due to the war between Russia and Ukraine. Euro currency fluctuations also affect desire of customers to purchase new devices.

In order to better reflect the change of control of the Group, the Company's English name changed to "Leadway Technology Investment Group Limited" and the Company's Chinese name changed to "高維科技投資集團有限公司". The new names provide the Group with a more appropriate corporate image and identity which benefit the Group's future business development and is in the best interests of the Group and its shareholders as a whole.

PROSPECTS

Ongoing geopolitical tensions and the emergence of mutated viruses of COVID-19 will be two of the challenges shaping the year ahead. But the opportunities in terms of the growing trend of contactless payment, diversifying and upgrading our products offering all present opportunities for us.

In the second half of 2022, the Group will launch three new products including:

- ACR40T SIM Card Reader, the next generation small size token reader;
- ACR1252U Walletmate, a new reader supporting Apple VAS application; and
- ACR1581 next generation Dual-Interface Card Reader.

We will also join the 2022 (18th) China International Internet of Thing Exhibition (IoTE) in Shenzhen in the second half of 2022 for promoting our products and our corporate image in the industry. In addition, the Group plans to explore new opportunities in new developing countries in South East Asia by introducing our products and services.

The global economy remains volatile and uncertain against a backdrop of inflationary pressures and geopolitical tensions. The Group stays resilient amidst these challenging times. We will continue to put efforts in enhanced promotion, excellence of products and service, development of innovative products as well as excellent customer relationship management and talent management in smart card related technology.

LIQUIDITY, FINANCIAL RESOURCES AND CAPITAL STRUCTURE

At all times the Group maintains a healthy liquidity position. As at 30 June 2022, the Group's cash and cash equivalents amounted to HK\$43.7 million (31 December 2021: HK\$51.5 million). The Group's equity capital and the cash generated from operating activities has been applied to fund its working capital and other operational needs. The Group recorded net cash outflow in operating activities of HK\$2.3 million (2021: net cash inflow of HK\$2.5 million) for the Interim Period, the amount turned from inflow to outflow was mainly due to more cash consumed in daily operations such as purchase of inventories and settlement of trade payables during the Interim Period. The Group recorded net cash outflow in investing activities of HK\$3.2 million (2021: HK\$2.7 million) for the Interim Period, the amount increased as a result of more capital expenditures spent on development projects during the Interim Period. The Group recorded net cash outflow in financing activities of HK\$2.2 million (2021: HK\$2.2 million) for the Interim Period, which was due to the capital and interest elements of lease rentals paid.

FUTURE PLANS RELATING TO MATERIAL INVESTMENT OR CAPITAL ASSET

EXPOSURE TO EXCHANGE RATE FLUCTUATIONS

The assets, liabilities and transactions of the Group are primarily denominated in Hong Kong dollars, United States dollars and Renminbi. As Hong Kong dollars is pegged to United States dollars, exchange risk arising from United States dollars does not have significant financial impact to the Group. However, the Board believes that vesting the roles of both co-chairman and chief executive officer in Mr. Zhang Xueqin has the benefit of ensuring consistent and continuous planning and execution of the Company’s strategies and will enable the Board to function more effectively when Mr. Mai Zhaoping, the co-chairman and executive director of the Company, is not available to attend the Board meeting in person. It is expected that Mr. Zhang Xueqin will perform the other functions and responsibilities of the chairman under the CG Code. The Board considers that the balance of power and authority, accountability and independent decision-making under the present arrangement will not be impaired in light of the diverse background and experience of the Board, with not less than one third of them being independent non-executive directors.

DIRECTORS’ SECURITIES TRANSACTIONS

The Company adopted dealings rules regarding directors’ securities transactions on terms no less exacting than the required standard set out in the Model Code for Securities Transactions by Directors of Listed Companies (the “Model Code”).
